

# Perimeter E-Security Earns 5 Star Product Review from SC Magazine

“We found all the Dashboards to be easy to navigate and well-organized. Through the use of a correlative security engine, called Viewpoint 2.0, customers get instant access to Data for reporting and Compliance Purposes.”

Peter Stephenson  
SC Magazine, September 2009

## Perimeter E-Security's Firewall and Intrusion Prevention Benefits:

- ♥ Immediately repels attack attempts and denies the intruder access to the network.
- ♥ Monitors logs and analyzes trends in intrusion attempts to ensure the network stays consistently secure against threats
- ♥ Instant access to data for reporting and security compliance purposes
- ♥ Viewpoint dashboard provides an in-depth overview of the network security systems in place
- ♥ 24/7/365 constant monitoring

## SC Magazine Gives 5 Star Rating to Perimeter E-Security Firewall and Intrusion Prevention Service

Perimeter's Firewall and IPS services were awarded the 5 Star rating from SC magazine! In reviewing 7 attribute categories we came up five stars in each category; features, ease of use, performance, documentation, support, value for money and overall rating. No other provider in the review achieved the 5-star rating across the board.

Why trust your company's security to anything other than a 5-star firewall and IPS? Especially when considering Perimeter's Firewall and IPS Services were 5 stars when it came to "Value for Money".

The Perimeter Firewall and Intrusion Prevention Service provide 24/7 real-time protection. With security engineers who are immediately notified when suspicious activity is detected and take appropriate action. We monitor your network, configure and maintain the firewall device, monitor logs and analyze trends in intrusion attempts.

Perimeter's top rated Firewall service helps you achieve the full value from your firewall investment. With this service, you can be confident that your firewall, which delivers your security strategy's first line of defense, is available, performing optimally and has not been compromised.

Our Intrusion Prevention Services takes security one step further ensuring a stronger defense against both known and unknown attacks. Combining a set of signatures of known attack patterns and behavior-based analysis, clients maximize their response to malicious activity across a network.

Over 2,000 financial institutions across the United States trust Perimeter with their data and security. We understand the unique needs to remain compliant with the rigid mandates of the FFIEC, SEC, FINRA, SOX, and the Federal Rules for Civil Procedures (FRCP). Our services are designed to complement your current infrastructure or stand on their own.
